

Adapter SC/UPC, SM, SIMPLEX

The DATAWAY SC/UPC optical adapter is designed for precise and reliable connection of two SC/UPC optical connectors in singlemode optical networks. Thanks to UPC grinding, it ensures very low back reflection and stable optical parameters, which is essential for FTTH/FTTx and GPON applications.

The adapter is suitable for installation in optical distribution boards, FTTH boxes, sockets and patch panels. The simplex design allows the connection of one optical fiber with high precision and long-term reliability.

Main features:

- Type: optical adapter (coupler)
- Connectors: SC/UPC – SC/UPC
- Design: simplex
- Insertion loss IL: <0.2dB
- Fiber type: singlemode (SM)
- Low attenuation and very low back reflection
- Precise ferrule centering
- Suitable for FTTH, FTTx, GPON, distribution boxes and optical outlets
- Color: blue (UPC)
- High-quality and durable workmanship
