

Tool HT-MBT

DATAWAY MBT are robust tensioning pliers designed for tensioning and fixing steel strapping during assembly and installation work. They are designed for straps up to 20 mm wide and 1.5 mm thick, which makes them a reliable tool for professional use in telecommunications, electrical installations, construction and for fastening masts, consoles or switchboards.

The solid metal construction, precise tensioning mechanism and ergonomic handle allow you to achieve high strap tension with minimal effort and maximum control.

Main features:

- Designed for steel cable ties
- Maximum strap width: 20 mm
- Maximum strap thickness: 1.5 mm
- High tension force for a firm and secure hold
- Robust steel construction - long service life
- Ergonomic handle for comfortable handling
- Suitable for telecommunications, electrical and assembly work
- Ideal for fastening masts, consoles, switchboards and cable routes
